AI SALES AGENT

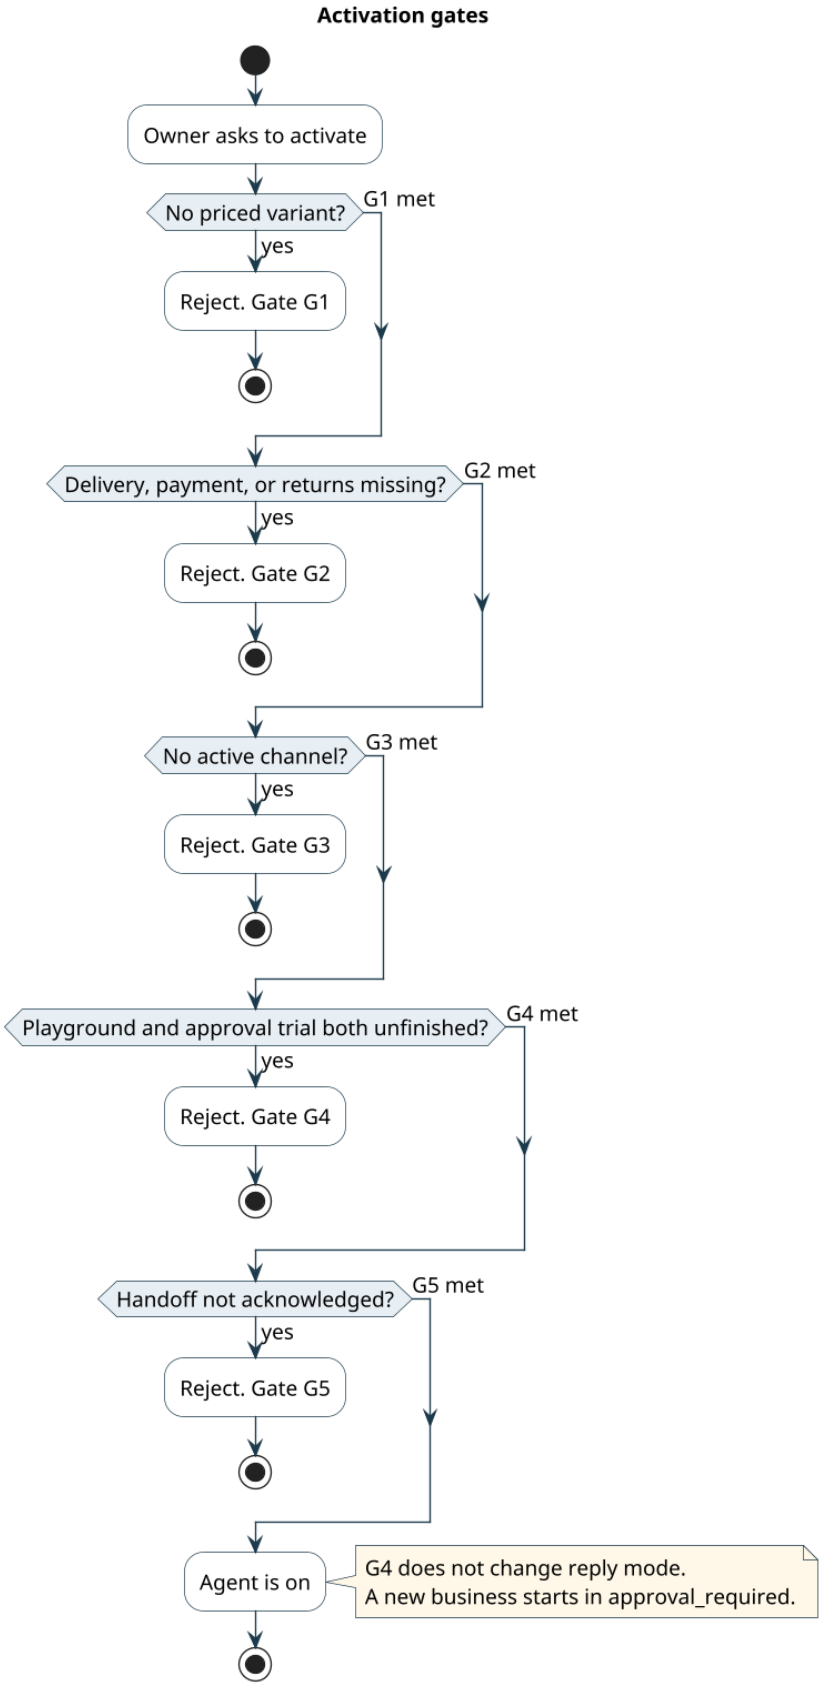

Activity diagrams

Decisions and alternate paths for activation, inbound processing, and purchase collection.

Phase 1 MVP · 21 October 2026 · Prepared from the canonical documents in docs/

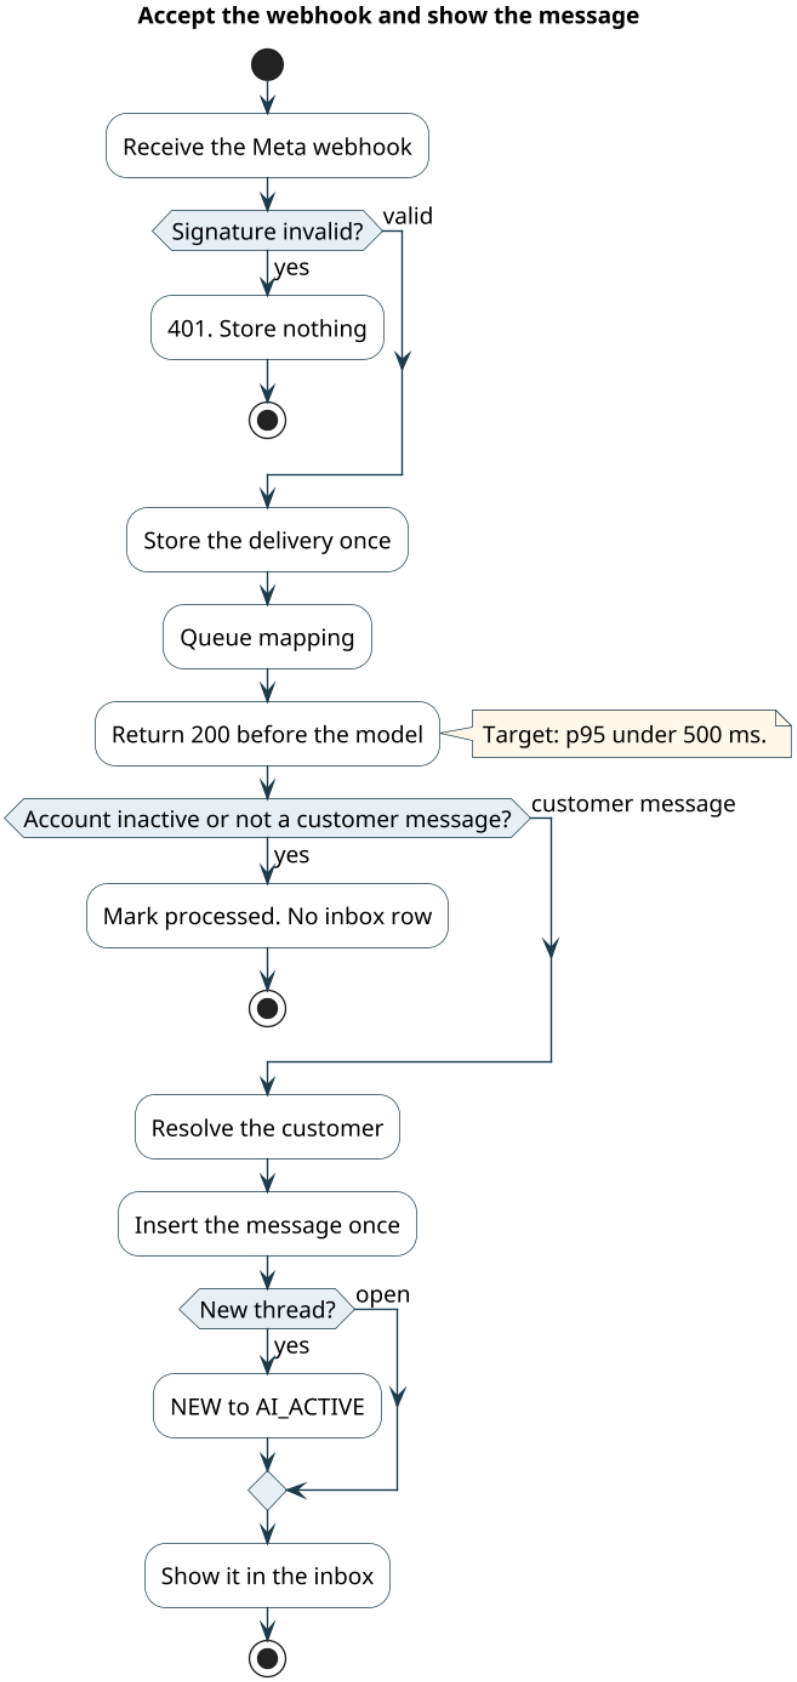

Activation gates

Any missing gate rejects activation. Passing the AI test does not switch reply mode. Source: `submission/sources/diagram-source-files/10-activity-onboarding.puml`.

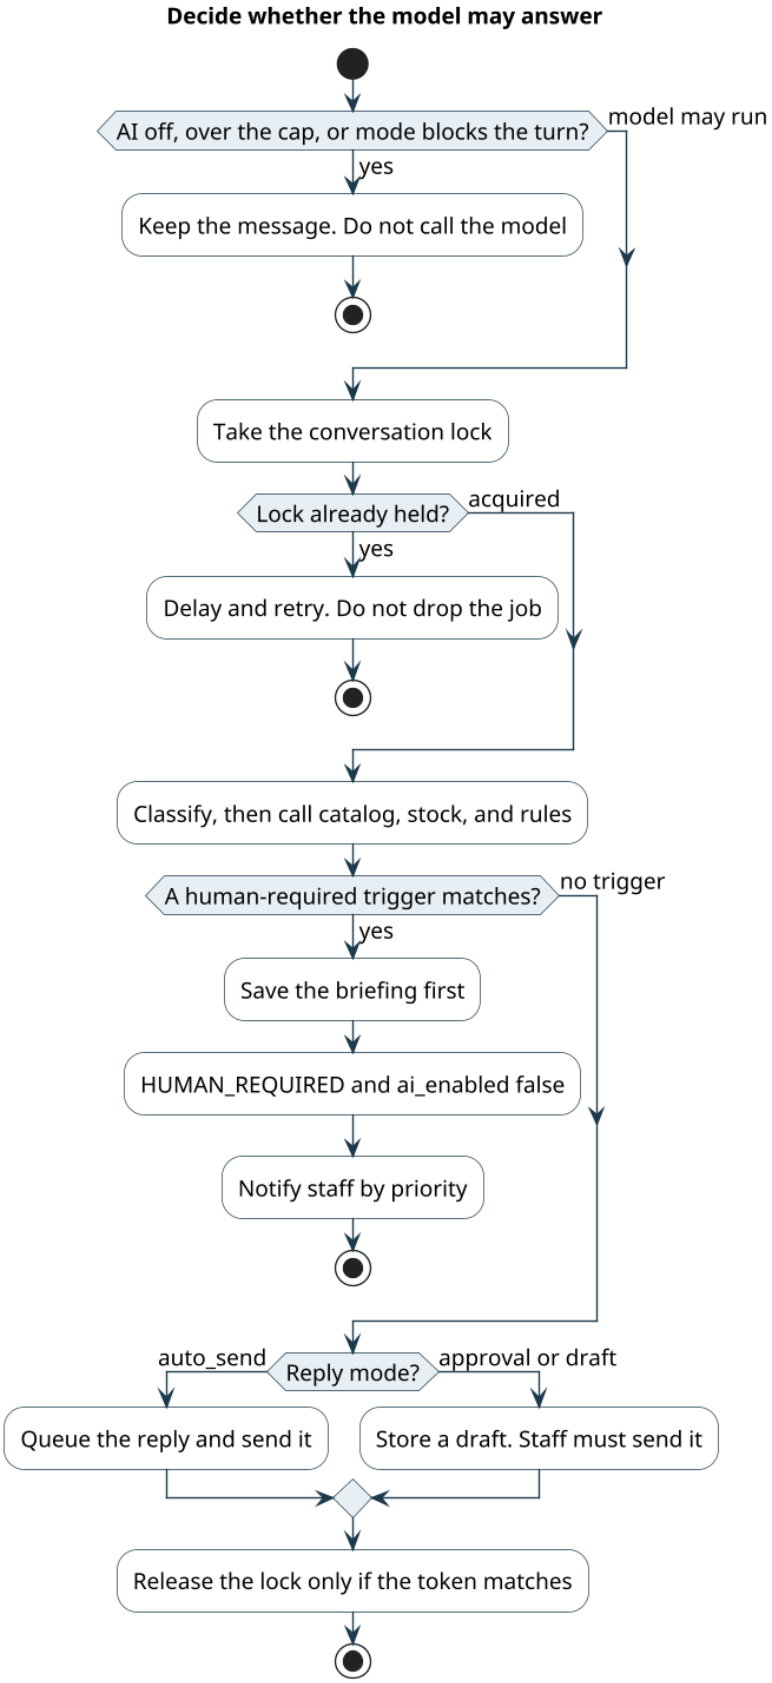

Accept a customer message

An invalid signature is not stored. The HTTP 200 does not wait for the model. Source: `submission/sources/diagram-source-files/11-activity-inbound.puml`.

Decide the reply

The model is skipped when the agent is off or over the cap. Approval mode stores a draft. Source: `submission/sources/diagram-source-files/11b-activity-worker.puml`.

Purchase collection

A failed stock check does not create an order. Source: `submission/sources/diagram-source-files/12-activity-purchase.puml`.
