AI SALES AGENT

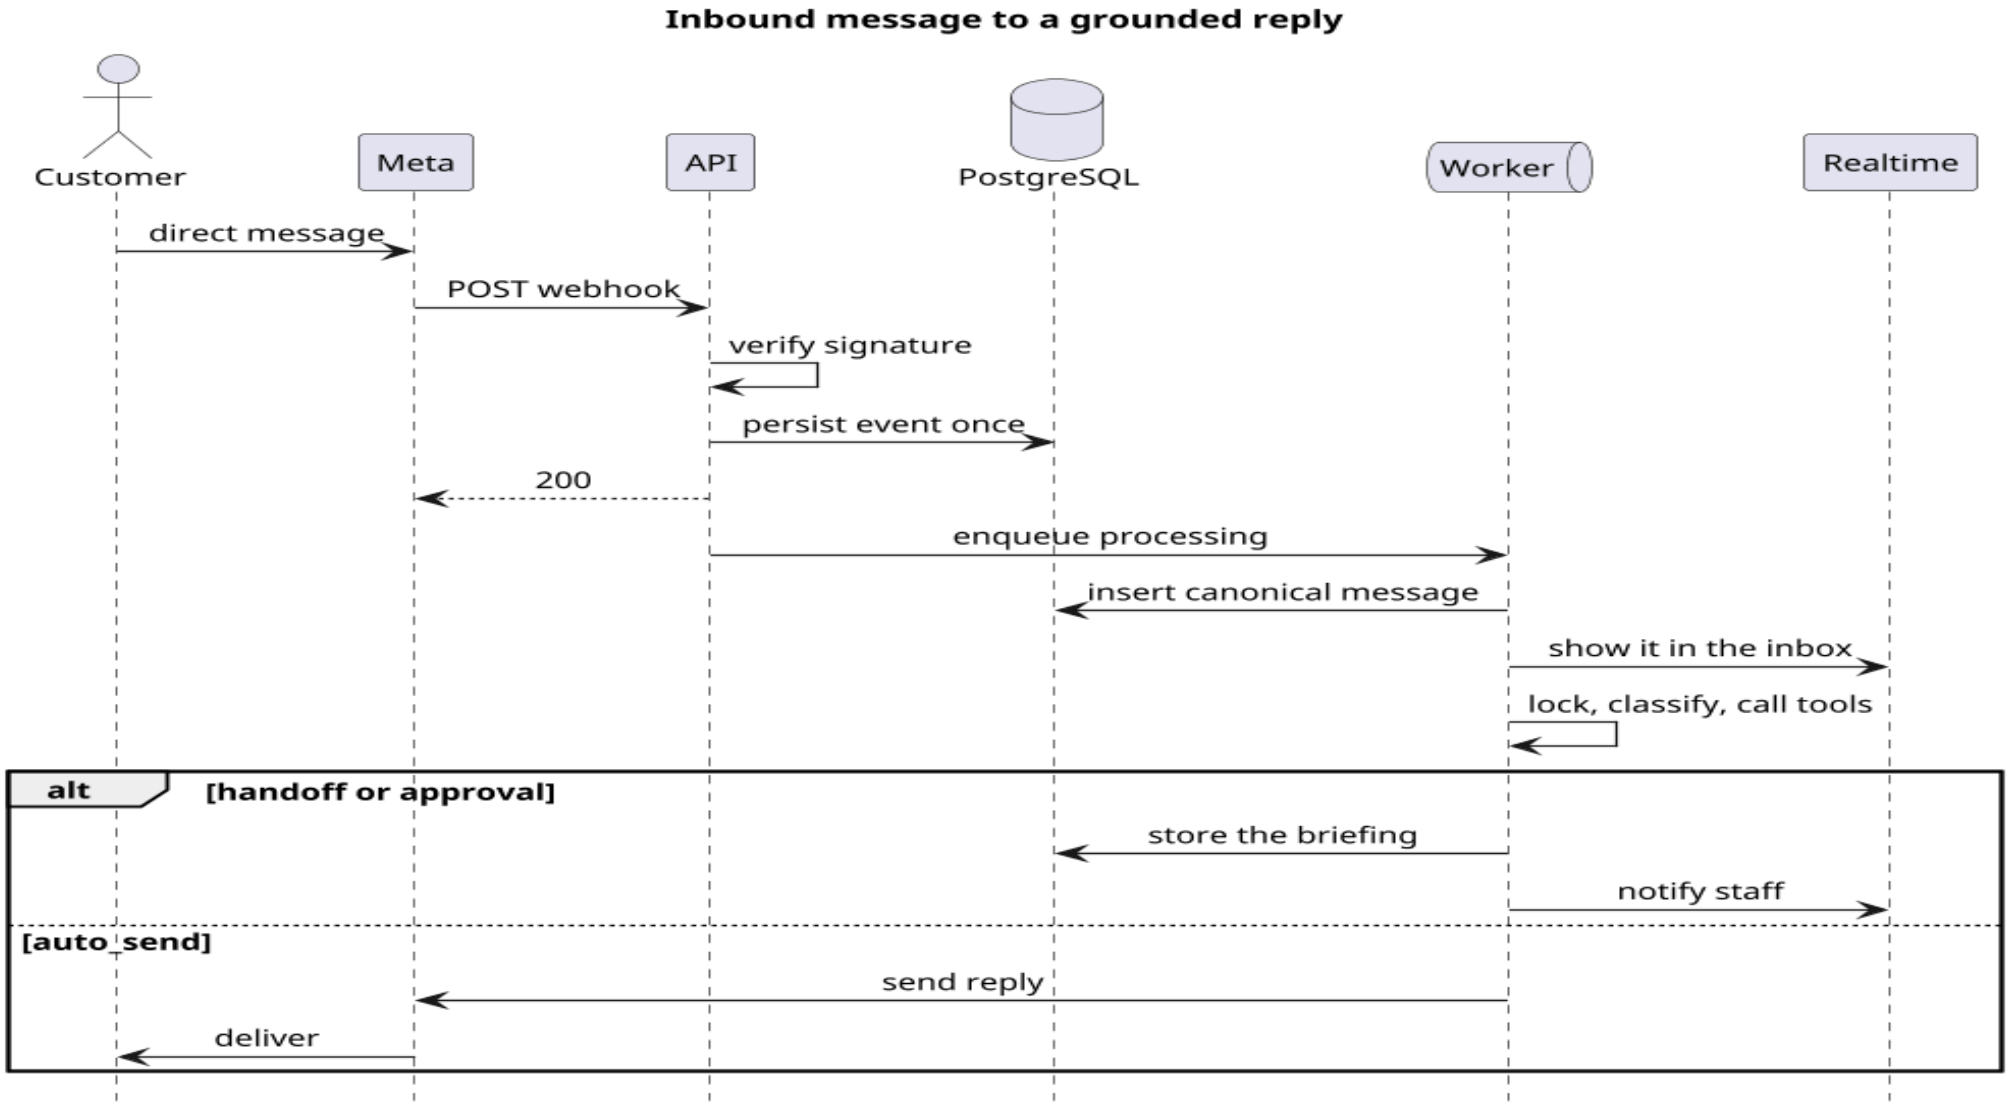

Sequence diagrams

Chronological interactions for the four flows that define the MVP.

Phase 1 MVP · 21 October 2026 · Prepared from the canonical documents in docs/

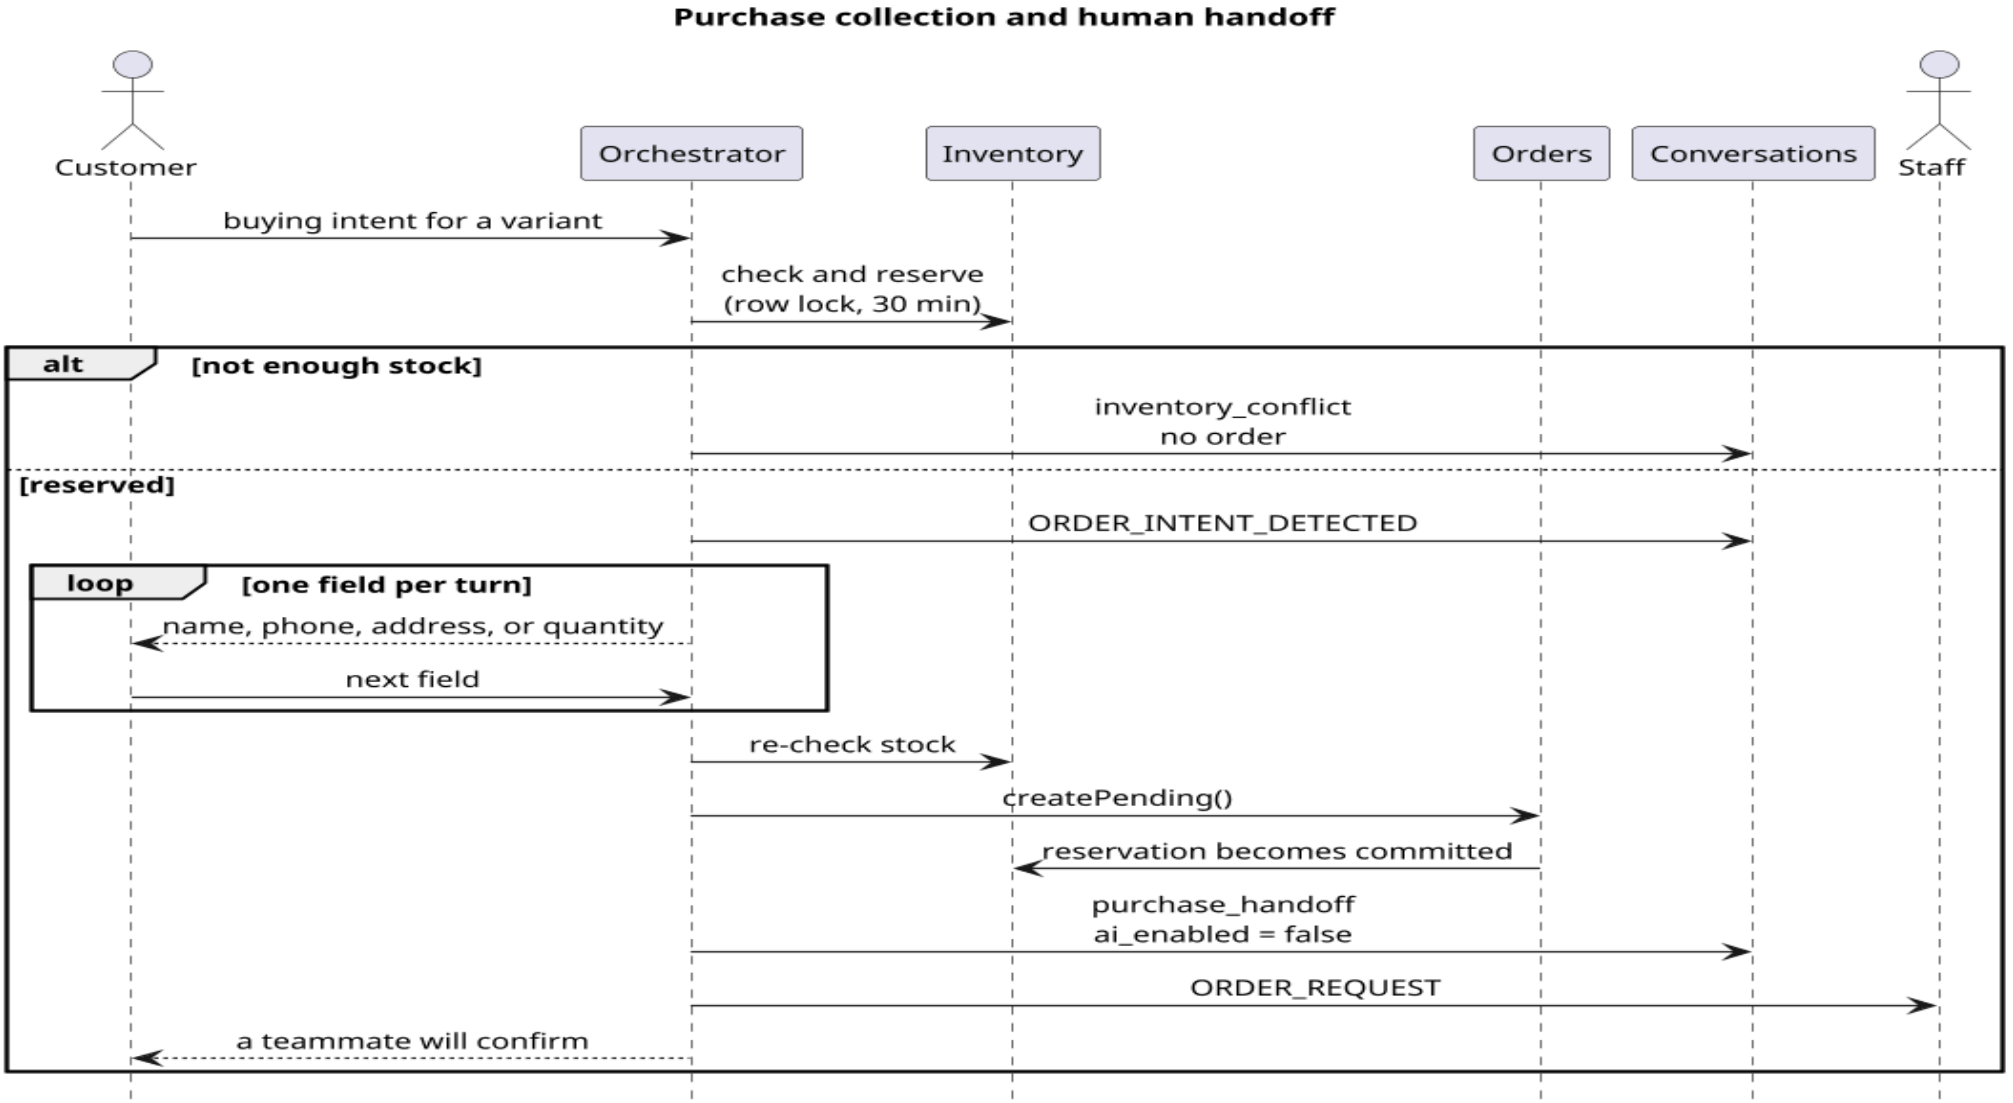

Inbound message

The webhook returns before the model runs. Approval mode stores a draft. Source: `submission/sources/diagram-source-files/06-sequence-inbound-reply.puml`.

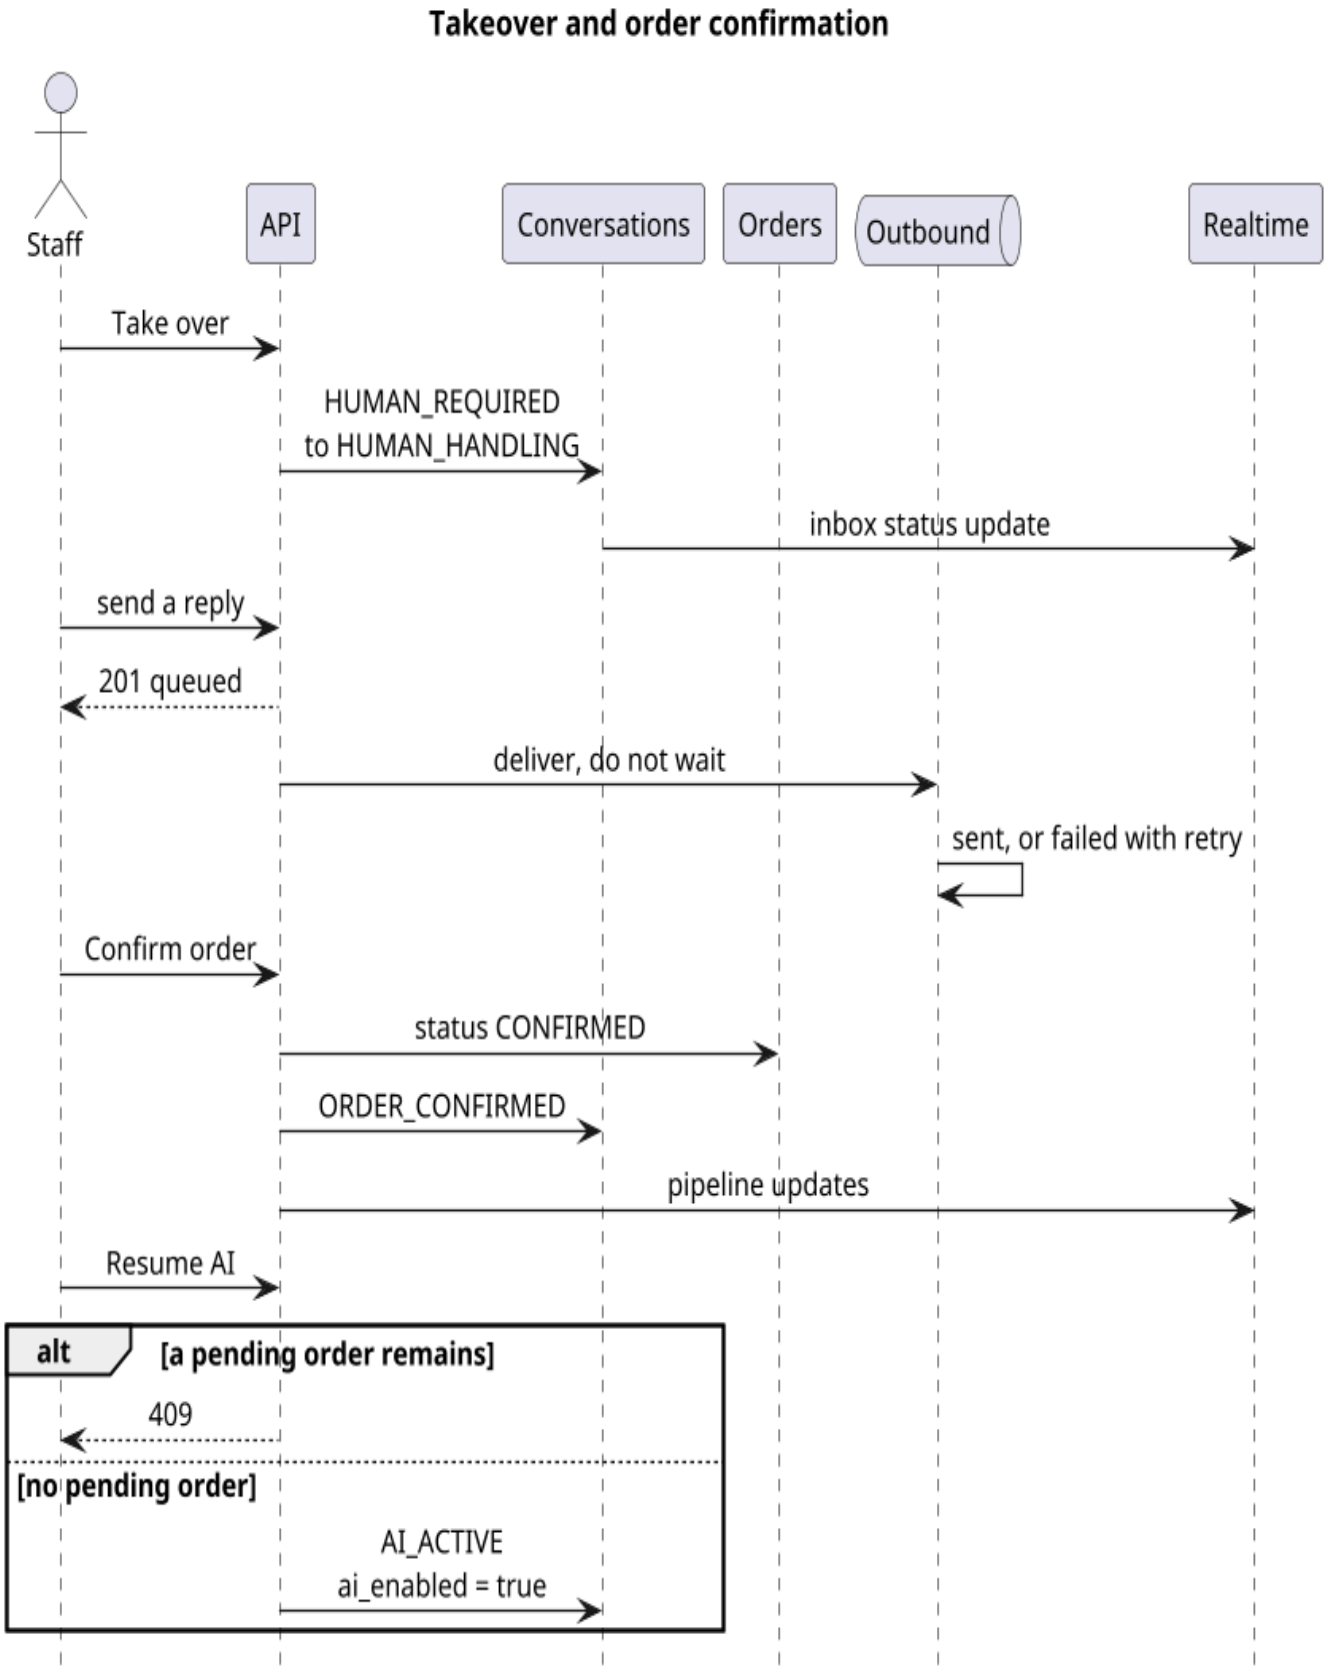

Purchase handoff

Reserve, collect one field per turn, create a pending order, then stop the agent. Source: `submission/sources/diagram-source-files/07-sequence-purchase-handoff.puml`.

Takeover and confirmation

Staff reply without waiting for Meta. Resume is rejected while an order is pending. Source: `submission/sources/diagram-source-files/08-sequence-takeover-confirm.puml`.

Connect a channel

OAuth state is in Redis. The token is stored by reference, not in PostgreSQL. Source: `submission/sources/diagram-source-files/09-sequence-channel-connect.puml`.
